WORK EXPERIENCE

Dazed Digital / AnOther

Web Designer, July 2010 - Present

Dazed Digital and AnOther are two of the largest independent fashion and lifestyle publications in the UK. I design and develop front-end solutions for their sites, special projects and ads.

SEEN All Over

UX/UI Designer, December 2009 - July 2010

SEEN All Over is an online publication combining aggregated and curated content from an all star cast of established tastemakers from various subcultures. Working with SEEN's in-house designer, I developed a multi-author CMS to showcase their wide range of daily postings, syndicated weekly columns, and advertising.

Paddington Festival

Web Developer, May 2010 - June 2010

Already having a WordPress platform set up, I designed and developed a custom theme from scratch to transform the web presence of the Paddington Festival from a basic blog to a fully functional website with the ability to search for events by date, interest, and keywords.

Hexed Press

Co-Founder and Art Director, March 2007 - Present

Hexed Press is an art collective and printing service I started with my good friend Jarod Isenbarger. The aim of Hexed Press is to provide the highest quality design and printing for selected projects. Since its launch, we have had several high-profile clients within various specialized creative communities.

IU Office Of Creative Services

Web Production Assistant, August 2005 - August 2006

My duties while working for the Office of Creative Services included hand-coding W3 compliant XHTML and CSS, developing web-based designs for clients, and working with backend developers to help create practical solutions for various organizations throughout Indiana University.
